

The girlfriends. game

HOW TO USE SCORE SHEET:

1. To begin, each player gets a score sheet. Use multiple if needed.
You can also copy the format and use scrap pieces of paper.
2. Each Player takes turns picking one card and answering the question off the card they chose. After player answers, rate the answer from 1-5.
Consider things like: Juicy detail, crowd reaction, shock value, delivery.
3. For a 'Never Have I Ever' card, player who picks it can answer themselves or choose who answers. Player who picked the card still gets the points! You can give bonus point(s) to player who answered. Decided as a group before you start!
4. For a 'Would You Rather' Card - give an explanation as to why for more detail and point earning potential.
5. If you decided to each use one 'pass' and choose to have another player answer a card you do not wish to answer, you lose the points. Player who answers get the points.
6. At the end of the game you'll have a total for each player, so will everyone else playing.
(ie. Q1 - Q7 ratings added together is **player total**).
7. Once everyone has added their individual player totals, have one person add all **player totals** together (from each player).
8. Winner has the highest collective points based on ratings from all players!
